Exciting Announcement: The 4th International Conference on the Science and Alchemy of Consciousness

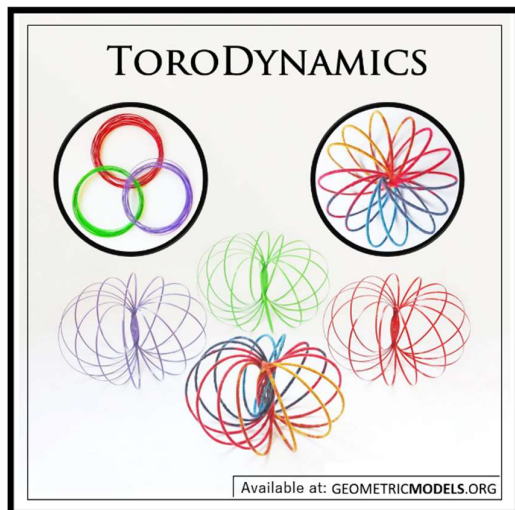

We are thrilled to announce our sponsorship of the "Science and Alchemy of Consciousness," the fourth international conference set against the stunning backdrop of the Pyrenees in South France. This unique event, featuring eminent speakers like Brigitte Nielsen on "Healing Ancestral Memories" and Juan Schlosser on "Fractal Architecture and Temple Design," promises to blend rigorous scientific inquiry with the mystical allure of alchemy. With opportunities to engage with cutting-edge technology like FlameInMind, PiezoPhire, and Theraphi, attendees will experience a seamless blend of learning and experiential discovery. Don't miss out! Limited accommodations available. Book now at info@geometricmodels.org

Introducing the Groundbreaking PiezoPhire.com

We are proud to present the PiezoPhire, our latest innovation in phase conjugate implosive technology. This advanced device focuses centripetal implosive forces to dramatically enhance healing, circulation, and pain reduction. The PiezoPhire operates through a pair of piezoelectric radiant resonators, harmoniously tuned to create a powerful lens effect that concentrates energy fields. Experience the transformative power of precision-engineered implosion sound, harmonized with our Bliss Binaural Sound app. Discover more and witness firsthand accounts at PiezoPhire.com.

Launch of the ©Torodynamics – Where Play Meets Precision

Continuing our tradition of merging play with educational purpose, we are excited to introduce the ©Torodynamics toy. Crafted from durable metal and available in a spectrum of vibrant colors, this torus-shaped delight offers a playful yet profound way to explore fractal science and sacred geometry. Perfect for learners and enthusiasts of all ages, ©Torodynamics invites you to spin, twist, and discover the dynamic beauty of our universe. Find out more at GeometricModels.org

New Insights: Exploring the Universe through the Lens of the Golden Ratio

Dive into the depths of the cosmos with our latest article, "Exploring the Planck Length through the Lens of the Golden Ratio." This piece unveils the fascinating intersection where the minute Planck length converges with the profound golden ratio, offering a glimpse into the fundamental structures that underpin our universe. Turn cosmic complexities into accessible insights with the ©Planck Tuner. Read the full story and expand your understanding of the universe's intricacies at <https://plancktuner.com/2024/02/18/exploring-the-planck-length/>

Stay Tuned, Stay Fractal

Join us on this fascinating journey at the intersection of science, spirituality, and discovery. At Geometric Models, we are constantly pushing the boundaries to bring you the most innovative tools and theories in the realm of sacred geometry and fractal science. Together, let's unlock the secrets of the universe!

Note from Dan Winter:

We are SO pleased that our message about serious science supporting spiritual choices has been SO welcomed. Our [Youtube.com/danwinterfractalfield](https://www.youtube.com/danwinterfractalfield) now reaching 50k subscribers, 3 mil views, 400 films - Our 4th international conference fractalfield.com/2024 already about sold out for Sept. And many of our [Fractalu.com](https://fractalu.com) events are reaching 5- 20k viewers each. AND the principles of implosion and negentropy are WORKING! in new [piezophire.com](https://www.piezophire.com) and more to come! So thank you from here... appreciate so much your dedicated interest and support.
