

November 12, 2024

Hey everyone!

We hope you all had a fantastic summer! Things have been buzzing on our end, and we're excited to share what's been happening and what's coming up!

Conference Recap: South France Magic!

Our recent conference in South France was an absolute triumph! We spent five glorious days immersed in inspiring lectures, forging invaluable connections, and savoring delicious food that was almost too good to be true. The vibes and resonances are still echoing in our hearts.

Drumroll, please... Dan Winter and the Geometric Models team are already deep in planning mode for next year's program! You won't want to miss it—stay tuned!

Upcoming Online Event: Mark Your Calendars!

Our friends Arturo and Lydia from the Geophilia Institute are hosting the 3rd International Congress – Sacred Geometry, Conscious Architecture & Wellbeing on November 16–17. It's a stellar online gathering featuring speakers like Dan Winter, Konstantine Korotkov, Doreya Karim, and Tufan Guven.

Don't miss out—use the promo code:
GEOMETRICMODELS.

PiezoPhire.com: Spreading the Vibes!

Our latest tech marvel, PiezoPhire.com, has been getting rave reviews worldwide! And the excitement doesn't stop there—Dan Winter is developing an extended version called PhireCrystal.com.

Stay tuned for more details soon; trust us, you'll want to be in the loop!

Introducing the Planck Tuner!

At Geometric Models, we're always pushing the boundaries to bring fractal vibes to life. Our latest creation, the Planck Tuner, is already making waves. It's the first-ever physical caliper/ruler designed to measure golden ratio multiples of the Planck length, stretching from 2 to 36 cm (max reach). Aligning with sacred dimensions has never been more precise!

Holiday Gift Ideas

As the holiday season approaches, we've prepared a special offer for your loved ones. Let's welcome the New Year with wishes for peace, love, and happiness in our hearts.

Happy gifting, and see you soon in our sacred geometry universe!

* More details on the website at GeometricModels.org

Letter from Dan Winter, Nov 12, 2024

Our close friends who regularly have 'a phone line to Thoth'.. have suggested an update.. They affirm there is particular contest going on- essentially for the valuable souls of the young people. We all rather knew this.. but now we can see the outline of how it works. When schools, playgrounds, and kids rooms are absolutely full of blue-tooth, 5G towers, wifi.. and every form of attention span shortening internet distraction.. a very particular kind of disconnect with soul is inevitable.

Our physicsofsoul.com project we believe has outlined a very particular and measureable physics - of what actually connects us to soul. Soul is a kind of pervasive DNA radio- made up of a coherent longitudinal array- which we now know is absolutely the measureable physics of lucid dreaming, memory thru death- AND the collective unconscious, ancestor memory and more. THOSE connections happen: - when we have any kind of bliss process, - when we feel and focus on any kind of REAL LOVE , - when we access the still-point (longitudinal embedding) of sacred space.

It is obvious our entire western culture now - of short attention span, AI, and extreme soul-numbing electrosmog- is absolutely immanently destroying (and feeding to parasites) the souls of our kids! Even tho now we COULD ACTUALLY teach electricians what is required to HAVE a soul! It is now more paramount than ever- that we redouble our effort to offer to our families and our young, the critical opportunities to REACH INTO THEIR OWN STILL POINT...

Meaning: time in NATURE, time to FEEL LOVE, to BE IN NATURAL STILLNESS, to be in Harmonious relating to one another and to the universe... Time to escape the mind numbing electrosmog of most of our insane 'digital' culture. The time to graduate souls from this planet is reaching a crunch point..

Every decision to act to re-connect the bliss fountain.. can be truly life or death.. Just my 2 cents from here..

Dan W.
